### **Research**

Impact of humans on watershed processes, including water balances, sediment budgets, channel morphology, and water quality. Study sites include American Samoa, Tijuana, San Diego, California Central Valley, southern India, and the Indian Himalaya. Techniques include remote sensing of land cover, evapotranspiration, terrain (3D photo reconstruction), modelling, and fieldwork for channel geometry, streamflow, and water quality characterization.

### **Professional Academic Experience**

2015-Present	Professor of Geography, San Diego State University
2010-2015	Associate Professor of Geography, San Diego State University
2007-2010	Assistant Professor of Geography, San Diego State University
2003-2005	Postdoctoral Scholar, International Water Management Institute

### **Education**

2003	PhD, University of California, Santa Barbara, Geography
2000	MA, University of California, Santa Barbara, Geography
1995	A.B., Princeton University, Ecology and Evolutionary Biology
