
AAG 2008 Session: **Spatial Data Mining and Exploratory Data Analysis**

Sponsored by the *Geographic Information Science, Spatial Analysis and Modeling*, and *Cartography* Specialty Groups.

This session will address new research in the theory, design, implementation, and application of data mining and exploratory data analysis techniques to spatial and spatio-temporal data. Potential topics include:

- * Spatial data mining and knowledge discovery
- * Visualization/visual data mining/visual analytics
- * Exploratory spatial data analysis
- * New software tools
- * Applications of spatial data mining to social and physical science data

To present a paper in the session:

1. Register and submit your abstract online (<http://www.aag.org/annualmeetings/>).
2. Email your presenter identification number (PIN), paper title, and abstract to both of the session organizers by **October 25, 2007**.
