DISSERTATION

Participation in Informal Labor Markets: Evidence from Latina Immigrants in Los Angeles

Abstract: Using a unique survey of unauthorized Mexican immigrants combined with 1990 Census data, the dissertation analyzes participation in informal economic activities and labor market outcomes of Latina immigrants in Los Angeles County by focusing on the local interaction between structural factors (i.e., immigration, economic restructuring, social networks) and individual-level variables (i.e. race, ethnicity, gender, and human capital).

Advisors: James Robinson (Chair), Michael Dear, John Elliott, and Nora Hamilton.
